Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 10-26, drawn to a rotary friction welding machine/apparatus.

Group II, claim(s) 27-28, drawn to a method for rotary friction welding components.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The Prior Art patent GB1,053,233 (from IDS filed 9/7/2006) discloses all the limitations of claim 10 including a rotary friction welding machine (figure 4) for joining or connecting components, with a first rotating spindle and a second non-rotating spindle, wherein a first component of the components being connected to one another is positioned on the first spindle and a second component of the components being connected to one another is positioned on the second spindle, wherein several flywheel mass bodies 37a are positioned on the rotary friction welding machine, wherein the flywheel mass bodies cooperate with the first rotating spindle such that at least one of the flywheel mass bodies 37a can be brought out of operating engagement or into operating engagement with the first rotating spindle, and wherein flywheel mass bodies that are in operating engagement with the first rotating spindle and flywheel mass bodies that are out of operating engagement with the first rotating spindle are positioned on the rotary friction welding machine (page 2 column 2 lines 95-125). As a result of the lack of the same or corresponding special technical features, no single general inventive concept exists. Therefore, the restriction is appropriate.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ERIN B. SAAD whose telephone number is (571)270-3634. The examiner can normally be reached on Monday through Thursday from 8am-5pm Eastern time.
